

Audit Shield claims activity across New Zealand

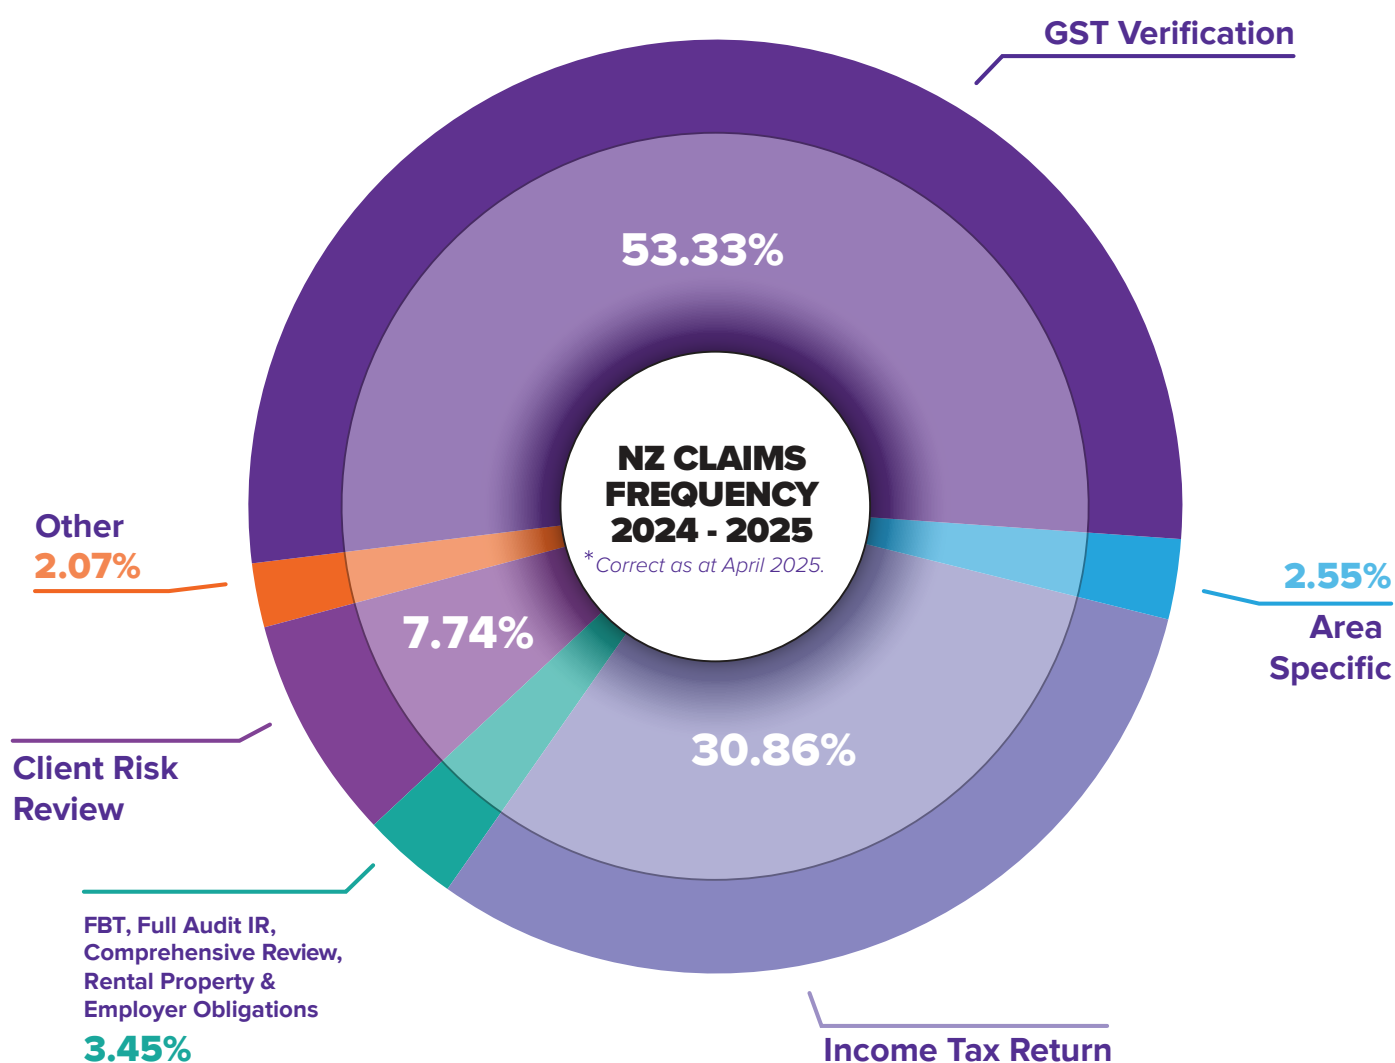

1 April 2024 - 31 March 2025

Whilst we make all efforts to prepare your financial accounts and tax returns accurately, we cannot control Inland Revenue (IR) from randomly instigating review or audit activity on you or your business. When a review or audit hits, it is often a result of a specific crackdown through a variety of data matching or other artificial intelligence sources.

These methodologies have proven to work very well and there are no signs to show that IR will ease up on these.

This pie chart outlines 2024 - 2025 Audit Shield Master Policy claims across New Zealand as compiled by Accountancy Insurance*.

All of our clients are invited to participate in our Audit Shield Master Policy. Cover is available for self employed, salary and wage earners, and businesses with turnover under \$100 million.
